

Opt-Out Form

Please complete and return this form to your local surgery.

I. CARE.DATA

NHS England's care.data system aims to provide timely, accurate information to citizens, clinicians and commissioners about the treatments and care provided by the NHS. It is managed by the Health and Social Care Information Centre. Please refer to the NHS England's care.data patient information leaflet before completing this form which can be found on the NHS Choices website www.nhs.uk

A. I do not want any identifiable information about me to be shared with the Health and Social Care Information Centre for care.data.

I understand that in the event of a national emergency this opt-out may be overridden.

I understand that this opt-out only applies to records held by my GP practice and not to records held by hospitals or any other health services.

B. I am happy for identifiable information about me to be shared with the Health and Social Care Information Centre for use within the NHS but I do not consent to information about me being passed on to any other organisation or third party for any purpose.

2. SUMMARY CARE RECORD

Is an electronic record with contains information about the medicines you take, allergies you suffer from and any bad reactions to medicines you have had. Having this information stored in one place makes it easier for healthcare staff to treat you in an emergency, or when your GP practice is closed. You can change your mind at any time whether or not you have Summary Care Record, but you will need to let the Practice know. You will also be asked for your consent to view your record at the time of an emergency.

What does it mean if you opt out? An electronic summary of your record will not be viewable by other healthcare providers, however, information will still be shared by letter, email, fax or telephone.

A. I request for my clinical information to be withheld from the Summary Care Record

If you opt out of having your data uploaded to the Summary Care Record ("The Spine") your data will automatically be excluded from the Risk Stratification data.

2. RISK STRATIFICATION

Is a process for identifying and managing patients who are at high risk of emergency hospital admission. Typically this is because patients have a long term condition such as COPD or cancer. NHS England encourages GPs to use risk stratification tools as part of their local strategies for supporting patients with long-term conditions and to provide care plans and planned care with the aim to prevent avoidable admissions or other emergency care.

A. I request for my clinical information to be withheld from the Risk Stratification.

C. Please complete in BLOCK CAPITALS

Title: _____ Date of Birth: _____

Surname: _____ First Name: _____

Address: _____

Postcode: _____

Telephone: _____

Signature: _____ Date: _____

D. If you are filling out this form on behalf of another person or a child, their registered GP will consider this request. Please ensure that you fill out their details in section C and your details in section D.

Your Name: _____ Your Signature: _____

Relationship to Patient: _____ Date: _____

FOR PRACTICE USE ONLY (Please pass to Admin Team at Tibshelf): Patient record updated with Read Codes:-

9Nu0 - Dissent from secondary use of GP patient identifiable data

9Nu4 - Dissent from disclosure of personal confidential data by Health and Social Care Information Centre
